**January 23, 2009**

### **TO ALL OF OUR DEVOTED CUSTOMERS,**

A few days have passed since our last correspondence but since that time much has happened. Letters were sent January 13, and the same day Health Canada unbeknown was forwarded a copy as well; with this thought in mind we must assume this copy will be the same.

On the morning of January 15<sup>th</sup>, 2009 our facilities and private residences were raided; RCMP officers entered by gunpoint clearing the way for agents of Health Canada. After their 10 hour search they took all our computer hard drives, records and our entire inventory.

Thank you for your kind support during these troublesome times. We are not criminals we are humanitarians; we no longer want to retire and as a matter of fact we want to come back stronger than ever with federal reform. That which does not kill us only makes us stronger.

You may be wondering why we are disclosing this information; because if it can happen to us it can happen to you. Fear begets fear and it's time to bring our mutual cause into the light of day; collectively with public support we must voice our cries for change.

This letter is written on the day of global hope, the day President Obama was inaugurated as the 44<sup>th</sup> President of the United States. Three profound words revolutionized the people "yes we can" these simple words say it all. In Canada we are no different, we have the same concerns and opportunities and change will come if we stand as one. Enough is enough, we need to make our voices heard; **Change – yes we can.**

### **WHAT IS NEEDED?**

- Women must have continued access for natural progesterone to balance hormones and without side effects.
- The chronically ill need access to natural pain relieving products such as liquid SAM-E and DMSO; they are suffering.
- Cancer patients need alternatives to chemotherapy and radiation without suppressing their immune system.
- AIDS patient's need products like Lithium Orotate, Neurological Support and Adrenal gland to better cope with depression allowing them to live with dignity. (clinical trials support these remedies)
- Arthritis suffers need relief from constant pain without drug dependency; natural health products offer this relief.

- Maintaining ones health naturally should not be denied it should be our constitutional right.

**P2**

Jesus is quoted in Mathew 12:10-12

*And, behold, there was a man which had his hand withered. And they asked him, saying, is it lawful to heal on the Sabbath days? That they might accuse him; And he said unto them, What man shall there be among you, that shall have one sheep, and if it fall into a pit on the Sabbath day, will he not lay hold on it, and lift it out? How much then is a man better than a sheep? Wherefore it is lawful to do well on the Sabbath days.*

When the laws cause the people to suffer then the laws must be changed to protect the greater good.

GMP guidelines for quality and efficacy with label specifications are a must to guaranty purity and potency with all vitamin manufacturing, once these measures are in place natural food supplements and health food products must be made openly available and without restraint.

Make your voices heard by emailing, signing petitions and sending them to your members of parliament and to the Minister of Health, The Honourable Leona Aglukkaq. Elected officials need to know that Canadian's want their freedom of choice for health food supplements and holistic health care. If not today, then when?

Does the general public understand what will be lost when our freedom of choice is taken away? Today it's our accesses to supplements; will alternative health care be next? What about our choices for food, will unlabeled radiated and genetically modified food become our main food staples?

Public protest concerning the controversial Bill C-51 was the largest outcry ever but that is about to change with the silent Bill C-52. Our slogan should be **Change – yes we can**. The elected officials in Ottawa are placed in their positions by us; if we raise our voices till they understand our outrage they will finally begin to listen. The momentum for change is growing strong and now is the time for a national protest; a positive outcome will be manifested if we stand together as one. The power for change has always been in the hands of the public, remember this thought and let's keep it that way.

Yours in continued health,

MODERN DESIGN

p. s. regarding the handing of the petition, please be vigilant by making a photo copy for yourselves, fax a copy to 1-866-226-1822 and send the original to Buckley and Company 600-235 First Ave. Kamloops, B.C., V2C 3J4; an alternative to sending the original is to bring it to your local Member of Parliament and demand that he table it before the House, ask when this will be done because you want to view it on CPIC.
